This is a political study of the Umayyad Caliphate during the reign of 'Abd al-Malik ibn Marwan, 65-86 / 684-705. Exploring Materiality and Connectivity in Anthropology and Beyond provides a new look at the old anthropological concern with materiality and connectivity. It understands materiality not as defined property of some-thing, nor does it take connectivity as merely a relation between discrete entities. Somewhat akin to Heisenberg's uncertainty principle, it sees materiality and connectivity as two interrelated modes in which an entity is, or more precisely – is becoming, in the world. The question, thus, is how these two modes of becoming relate and fold into each other. Throughout the four-year research process that led to this book, the authors approached this question not just from a theoretical perspective; taking the suggestion of 'thinking through things' literally and methodologically seriously, the first two workshops were dedicated to practical, hands-on exercises working with things. From these workshops a series of installations emerged, straddling the boundaries of art and academia. These installations served as artistic-academic interventions during the final symposium and are featured alongside the other academic contributions to this volume. Throughout this process, two main themes emerged and structure Part II, Movement and Growth, and Part III, Dissolution and Traces, of the present volume, respectively. Part I, Conceptual Grounds, consists of two chapters offering conceptual takes on things and ties – one from anthropology and one from archaeology. As interrelated modes of becoming, materiality and connectivity make it necessary to coalesce things and ties into thing~ties – an insight toward which the chapters and interventions came from different sides, and one in which the initial proposition of the editors still shines through. Throughout the pages of this volume, we invite the reader to travel beyond imaginaries of a universe of separate planets united by connections, and to venture with us instead into the thicket of thing~ties in which we live. Colombia, one of South America's oldest, middle-income democracies, has developed rapidly despite a fifty year "simmering" civil war and increasing levels of urban and rural crime and violence. In the past decade, however, the scale and intensity of violence has changed from a marginal conflict to generalized violence that now dominates the daily lives of most citizens. As remote guerilla activity has turned into country-wide "war," bringing in paramilitary groups, drug cartels, and other social actors, so too the causes of violence have changed. These have included both external events such as the collapse of the Cold War, as well as internal changes relating to economic liberalization, coal and oil developments and the impact of the global trade in illicit narcotics. Violence in Colombia is highly complex not only because of the different categories, but also due to its multiple causes. This paper combines disparate existing theories to develop an integrated framework that identifies four different levels of causality: structural, institutional, interpersonal, and individual. It recognizes the mutually reinforcing role played by factors at different levels of causality. Underlying the causes of violence in Colombia is minimal state presence in many parts of the country, widespread corruption and impunity, high levels of societal acceptance of violence, and a regionally fragmented country. Robert Torrance's wide-ranging, innovative study argues that the spiritual quest is rooted in our biological, psychological, linguistic, and social nature. The quest is not, as most have believed, a rare mystical experience, but a frequent expression of our most basic human impulses. Shaman and scientist, medium and poet, prophet and philosopher, all venture forth in quest of visionary truths to transform and renew the world. Yet Torrance is not trying to reduce the quest to an "archetype" or "monomyth." Instead, he presents the full diversity of the quest in the myths and religious practices of tribal peoples throughout the world, from Oceania to India, Africa, Siberia, and especially the Americas. In theorizing about the quest, Torrance draws on thinkers as diverse as Bergson and Piaget, van Gennep and Turner, Pierce and Popper, Freud, Darwin, and Chomsky. This is a book that will expand our knowledge—and awareness—of a fundamental human activity in all its fascinating complexity.
