Every researcher or diagnostician working with reptiles has faced the challenge of identifying reptile hemoparasites and then determining whether they are of importance or merely incidental. Another challenge is how to easily find the information required to make the proper identification. A distillation of knowledge from world-renowned expert Sam R. Telford, Jr, *Hemoparasites of the Reptilia: Color Atlas and Text* provides a comprehensive compilation of information on how to differentiate between the myriad species of reptile hemoparasites. The atlas provides diagnoses for 262 species of plasmodiids, hemogregarines, hemococcidians, trypanosomes, and leishmanias, including descriptions of eight new species or new taxonomic designations. It also discusses lesser known groups, such as piroplasms, rickettsiae, chlamydia, and erythrocytic viruses. Each genus and many species are represented among

the 166 taxa illustrated in color. The species accounts contain host and geographic distribution, with precise localities when possible, prevalence, life cycles and vectors when known, effects upon the host, and ecology of the host-parasite relationship, morphological variation, and an exhaustive bibliography. The book also includes an illustrated key showing diagnostic characters. Telford draws on his 45 years of experience and his personal collection, considered the world's most complete, to provide information on the morphology of the unicellular parasites of reptilian blood. He includes information from hard-to-find original papers and articles from sources throughout the world. The illustrated key and photomicrographs from Telford's collection make identifying species quicker and easier. This atlas features outstanding full-color photographs of actual cadaver dissections, with accompanying schematic drawings and diagnostic images. The photographs depict anatomic structures more realistically than illustrations in traditional atlases and show students exactly what they will see in the dissection lab. Chapters are organized by region in order of a typical dissection. Each chapter presents structures both in a systemic manner from deep to surface, and in a regional manner. This edition has sixteen additional pages of clinical images—including CT and MRI—that students can compare with cross-sectional anatomic photographs. Many pictures have been electronically enhanced or rescanned for better contrasts. Now in striking full color, this Seventh Edition of Koneman's gold standard text presents all the principles and practices readers need for a solid grounding in all aspects of clinical microbiology—bacteriology, mycology, parasitology, and virology. Over 600 color plates depict salient identification features of organisms. The expert guide to identifying and understanding the differences of common dermatology conditions in patients with all skin tones. By 2050, it is expected that over nearly half the U.S. population will have darker skin tones or skin of color, yet physicians are still being trained to diagnose skin conditions based on white skin. Unfortunately, dermatologists, medical students, and other health professionals often inaccurately diagnose skin disease in skin of color patients due to inadequate training. Taylor and Elbuluk's Color Atlas and Synopsis for Skin of Color helps readers recognize the differences between skin of color and non-skin of color and through doing so will help lead to the provision of optimal care to patients with skin of color. The perfect resource for comparative study of dermatologic disorders in skin of color, Taylor and Elbuluk's Color Atlas and Synopsis for Skin of Color helps you recognize the differences between skin of color and Caucasian skin and provide optimal diagnosis of patients with skin of color. Through hundreds of color images, this unique guide illustrates the differences in appearance of common dermatology conditions between Fitzpatrick's Skin Type I-III light skin tones and Fitzpatrick's Skin Type IV-VI dark skin tones. Taylor and Elbuluk's provides a comprehensive look at common diseases that fall into the following categories: Inflammatory/Papulosquamous Disorders Infections Infestations/Bites Drug Reactions Follicular Disorders Benign Neoplasms Malignancies Alopecias Pigmentary Disorders Photosensitivity A unique combination color atlas and synoptic text on interventional cardiology procedures Within the field cardiovascular medicine, interventional cardiology has evolved rapidly in the last decade. In particular, there are advanced therapeutic valvular interventions that compare to historical outcomes with surgical approaches. Transcatheter aortic valve replacement may soon become the standard of care, and transcatheter mitral valve interventions continue to develop rapidly. In addition, improvements in drug-eluting stent technology continue to improve long-term outcomes. Keeping in mind of these rapid advances in interventional cardiology, we have put together this color atlas and synopsis of interventional cardiology to enable medical students, postgraduate physician trainees, practicing clinicians, including physician assistants, nurse practitioners, internal medicine physicians, and general practitioners so that they can rapidly assimilate information on a wide variety of interventional cardiology related topics. This practical, highly clinical resource fills the need in the literature for an interventional cardiology reference that provides expert textual guidance on patient diagnosis and management, along with a comprehensive collection of images (many in full color) illustrating specific procedures. FEATURES: •Logically divided into four sections: The Hemodynamic Study, Percutaneous Coronary Interventions, Non-Coronary Cardiac Interventions, and Peripheral Interventions •Strong focus on normal anatomy, radiographic anatomy, indications, contraindications, interpretations, and patient management •Most chapters begin with a case scenario, putting the issue into clinical, real-world perspective. This beautifully illustrated, concisely written resource is perfect for busy cardiologists of all specialties who require broad coverage of the topic in a convenient, quick-access presentation.
