The 24-Hour Tech is a training manual for those in the water damage or "restoration" field. This manual walks the reader through the 20-Step Mitigation Process. It is intended as a complete training manual for new Water Damage Technicians who wish to quickly learn how to properly document insurance losses involving water damage. Andrew McCabe developed this process over years of water damage claims experience. He still uses it today in his consulting practice - Claims Delegates. If you want to learn quickly how to properly document and perform water damage mitigation, without paying for an expensive certification class, The 24-Hour Tech is perfect for you. The process and manual are also the perfect complement to recent grads of WRT or ASD training classes. You may understand HOW to dry a structure, but The 24-Hour Tech teaches you how to get PAID by insurance companies. The results of the 20-Step Mitigation Process are meant to be handed to a professional Xactimate estimator and allow them to quickly create comprehensive estimates for insurance adjusters and carriers. This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant. 86906-86908, 85180, 87617 This manual is designed to teach criminal interrogators, professional investigators, and insurance examiners the skills they need to secure airtight statements and confessions from uncooperative witnesses and suspects. The authors reveal dozens of detailed methods which they have used to obtain precise and relevant information during questioning sessions -- the kind of information that has already led to the recovery of nearly \$14,000,000 worth of stolen property. The way in which a question is asked is the primary tool in any interview and this guide furnishes the skill-building techniques that virtually guarantee precise and relevant information flow from subjects. Concentrating on a systematic approach to effective interrogation, this manual explores such vital areas as: how to recognize when a suspect is ready to confess; how to handle a witness who deliberately withholds information; how to tell when a subject fears self-incrimination; how to obtain statements that hold up under the most severe legal scrutiny; how to break through a subject's defense barriers and expose concealed facts; how to interrogate a suspect influenced by alcohol, drugs or fatigue; and how to make sure the individual's legal rights are not infringed upon. In addition, there is an entire chapter dedicated to the professional code of ethics and standards for interviews and interrogators. Rules of evidence and the factors of admissibility, relevancy and competency are explored in depth. This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it.
